

I really enjoy my XM radio and the listening freedoms that accompany it. I don't believe that certain channels shouldn't be allowed. The XM radio offers a larger variety of music and other channels that regular radio doesn't. Also, the clarity of the sound that comes from the XM is much better than that of FM or AM. Certain people, like myself, live in areas where the variety on their AM and FM stations isn't that great, so I and many others benefit a great deal from the XM radio. I pay for it, and so does every other XM listener. Regulations should not be placed on our listening. So, I would really appreciate a rejection of the NAB's petition 04-160. Thank you,
Clarissa A (a concerned XM subscriber)
